Notes:

The MCAT exam changed in April 2015 to include additional topics such as psychology, sociology and statistics. Therefore, the recommended courses in the pre-med checklist reflect these changes and the courses were selected to help you prepare for the exam. Additional science courses that we recommend as a minimum include microbiology, cell biology and human physiology. The PERS 2499 course will help you learn the vernacular of science and medicine.

Note: All math and science courses require grade of C or higher.
